**Additional guidelines that Beverage for food service needs to comply with:**

- No free access to sugar/syrups to freshly brewed beverages
- Sugar/syrups cannot be served on the side
- Endorsement allowed if
  - (i) Beverage has been endorsed by HCS
  - (ii) & no additional new formulation from partner (except for ice addition)
- (i) Products carrying representation of health claims on product packaging or marketing advertisement collaterals will be excluded
- (ii) <sup>(a)</sup> Applies to the milk product used. Nutrition Information Panel (NIP) will be required as supporting document
- (iii) <sup>(b)</sup> Product with fat level between 2% and 5% will be approved if the % saturated fat is 20% or less of the total fat
- (iv) <sup>(c)</sup> Not applicable to cordials and concentrates, vegetable juice must contain 100% juice from vegetables
- (v) <sup>(d)</sup> For smoothies to be dairy based, they should contain at least 15% of dairy based ingredients. If fruits are added, dairy should be 40% of the total product to be considered dairy based.

<sup>(a)</sup>From NC1 of A Handbook on Nutrition Labelling (Singapore), a 'reference food' is defined as one of the following:

- i) The regular product which has been produced for a significant period by the manufacturer making the nutrient claim or
- ii) A weighted average of an industry norm for that particular type of food or
- iii) A food whose composition is determined by reference to published food composition tables

## Category: Source of Dietary Fibre

### Dietary Fibre Criteria:

---

Source of Dietary Fibre (g/100g) or (g/100ml)

---

≥3g

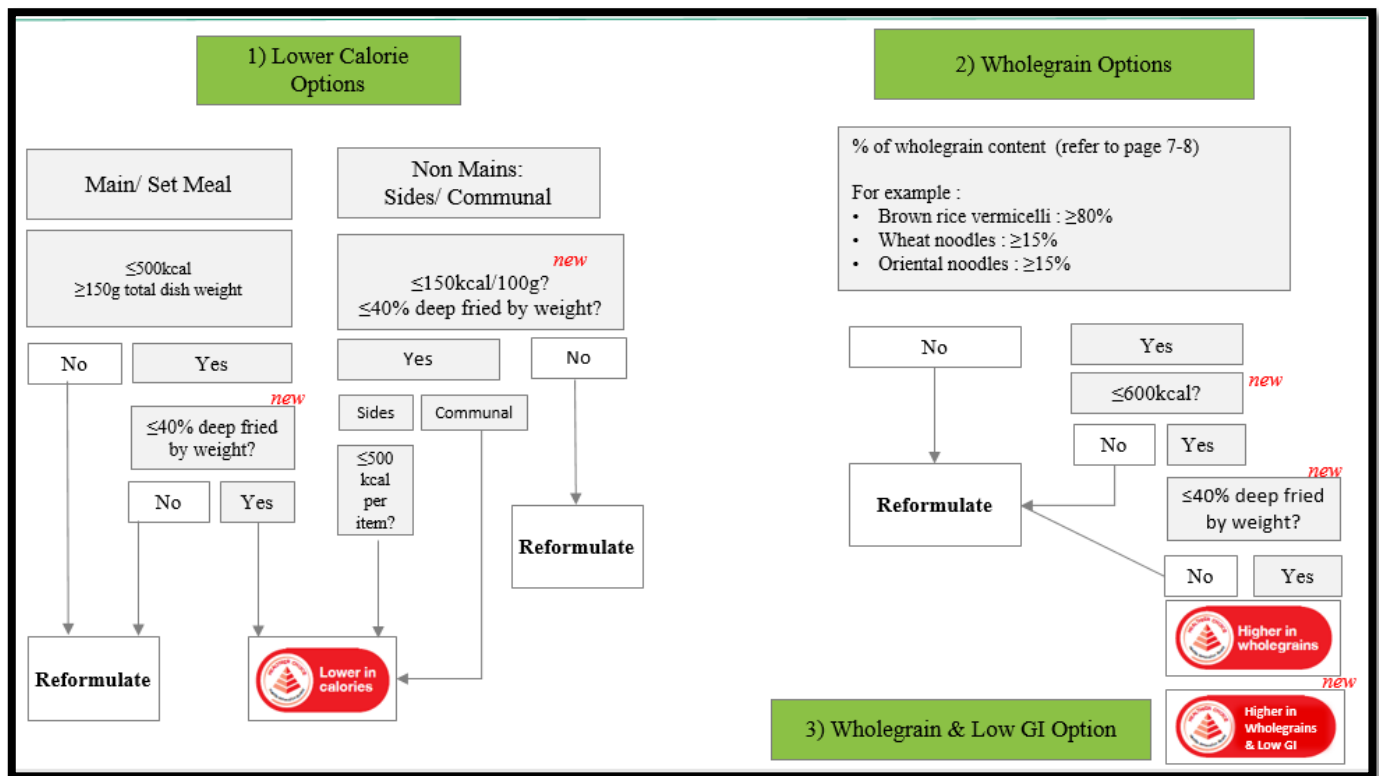

---

### Definition (by Codex Alimentarius Commission):

*Dietary fibre* means carbohydrate polymers with ten or more monomeric units, which are not hydrolysed by the endogenous enzymes in the small intestine of humans and belong to the following categories:

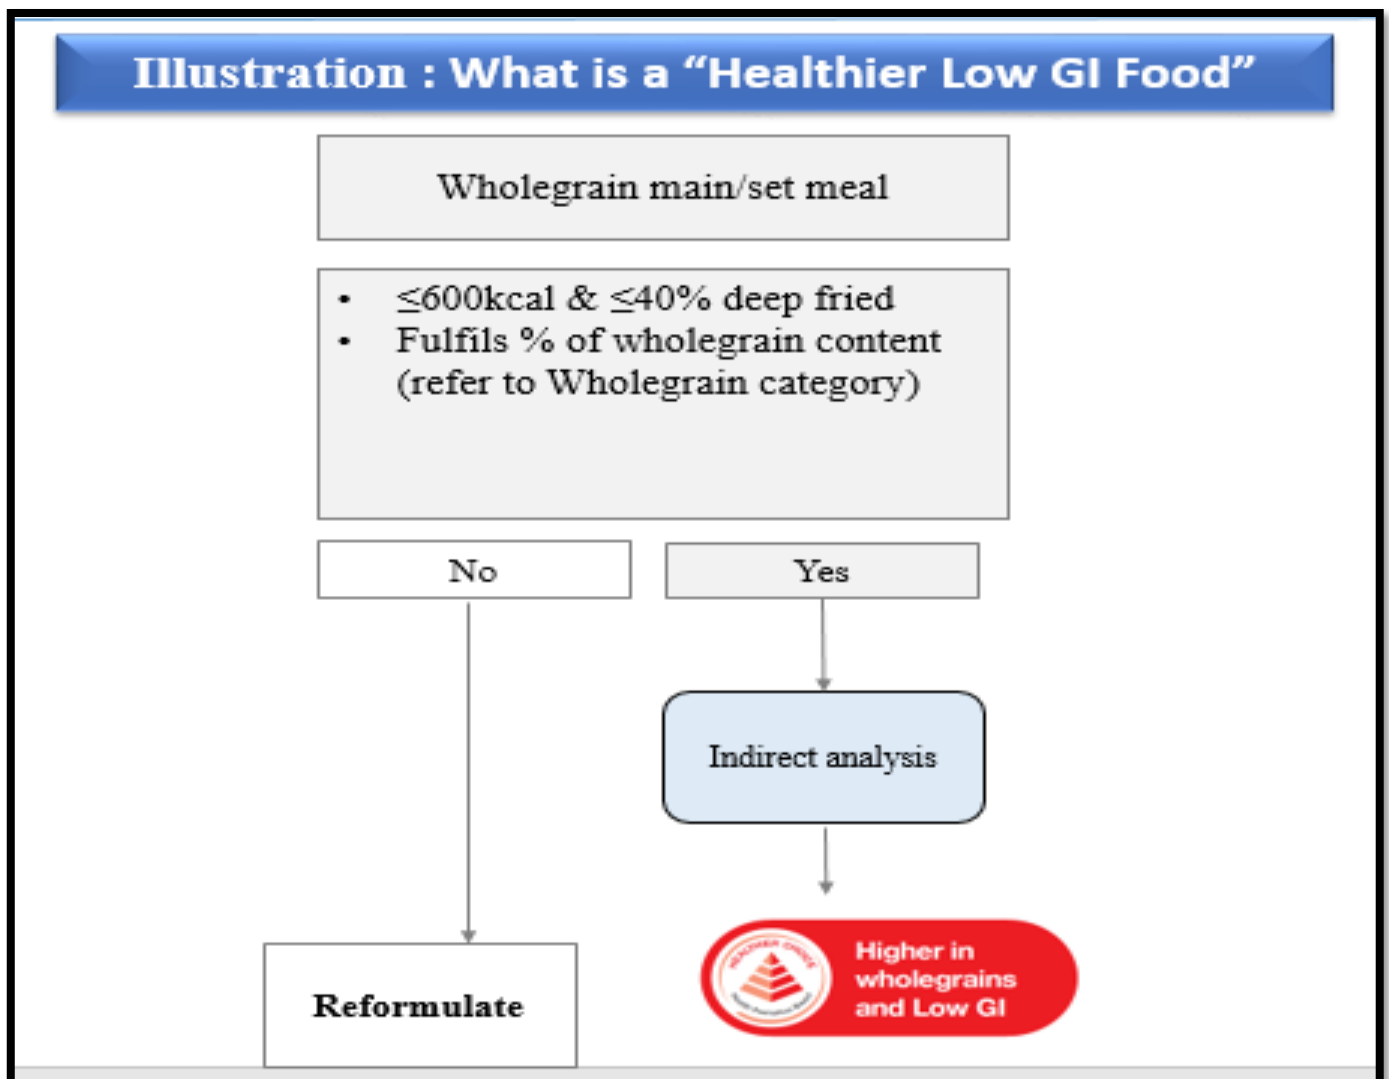

- Edible carbohydrate polymers naturally occurring in the food as consumed,
- Carbohydrate polymers, which have been obtained from food raw material by physical, enzymatic or chemical means and which have been shown to have a physiological effect of benefit to health as demonstrated by generally accepted scientific evidence to competent authorities.

## Notes

- \*Serving size assessed by Officer based on consumption dining pattern
- Above list is non-exhaustive, new cuisine will be assessed case by case basis

## Annex VI: Illustration of Main or Set Meal Criteria

<sup>1</sup> Officer will assess on a case by case basis based on consumer dining pattern. Item can include a drink, soup, salads or sides to qualify as set meal. Dish weight must be  $\geq 100\text{g}$  and can include soup, salads, sides or drinks. No desserts allowed to be part of set meal, however lower in sugar desserts can be endorsed as stated in the dessert category.

<sup>2</sup> Officer will assess on a case by case basis for dishes which has an overall representation of high sodium/salt sources such as the use of ham, bacon, sausages or layer of fatty meat cuts in dish.
